Offering strong foundation in IT principles and passion for learning and growth in consulting environment. Brings ability to quickly grasp new technologies and methodologies, along with skills in system analysis and process optimization. Ready to use and develop technical and analytical skills in ICT role.

SKILLS

- | | |
|-----------------------------------|-----------------------------------|
| • Network configuration expertise | • System installation |
| • Database optimization skills | • Proficient in operating systems |
| • Coding and process automation | • Technical troubleshooting |
| • Resolving network issues | • Information security oversight |

EXPERIENCE

April 2025 - Current

Mastered Seed Ltd - ICT Consultant, Bomet

- Network Installation and Configuration
- Install routers, switches, firewalls, wireless access points, and other network devices.
- Configure network hardware and software to ensure optimal performance.
- Set up physical cabling (Ethernet, fiber optics) and wireless networks.
- Maintenance and Troubleshooting
- Diagnose and resolve hardware, software, and connectivity issues.
- Perform regular system checks and preventive maintenance.
- Replace faulty network hardware components.
- Network Security
- Install and configure firewalls and antivirus software.
- Implement access controls, VPNs, and other security measures.
- Monitor networks for suspicious activity or breaches.
- Documentation and Reporting
- Document network layouts, configurations, and changes.
- Create manuals and technical guides for future reference.
- Provide regular reports on network performance and incidents.

- Team Collaboration
- Communicate technical information to non-technical users.
- Provide support and training to clients or internal teams.
- Reduced downtime by proactively addressing potential issues through regular system maintenance and updates.

September 2022 - January 2025

Kipuche Ltd - ICT Technician, Kericho

- Checking on fiber routes if it's okay.
- Educating community along fiber routes on importance of fiber.
- Assisting technicians during faults.
- Performing any other duties as assigned by technician.
- Increased efficiency with proper use of specialized tools like fusion splicers, optical power meters, and OTDRs.
- Completed installation projects within budget and timeline constraints by effectively planning and coordinating activities.
- Facilitated smooth handovers from construction teams to operations staff by clearly documenting all completed work prior to system activation dates.
- Improved network performance by installing, splicing, and testing fiber optic cables.
- Performed regular preventive maintenance on equipment used in fieldwork ensuring their optimum functioning at all times.

PROFESSIONAL QUALIFICATION

January 2018
